

HEALTH SAVINGS ACCOUNTS

HSAs are a tax-advantaged medical savings accounts available to taxpayers in the United States who are enrolled in a high-deductible health plan (HDHP). The funds contributed to an HSA are not subject to federal income tax at the time of deposit, and unlike a flexible spending account, HSA funds roll over and accumulate year to year if they are not spent. Over-the-counter medications cannot be paid with an HSA without a doctor's prescription and withdrawals for non-medical expenses are treated very similarly to those in an IRA in that they may incur penalties if taken early or for non-medical expenses. These accounts are a component of consumer-driven health care, and we are proud to be able to offer them to our members with a different debit card (shown below) to help differentiate your HSA from your other checking accounts.

Benefits of an HSA:

- Can deduct contributions that you make to your HSA on your federal income tax return
- Any HSA Contributions made through payroll deduction reduce your federal income tax liability, Social Security and Medicare taxes
- You own the HSA and can take it with you even if you change health plans or employers
- HSA distributions that you use to pay for qualified medical expenses are tax free
- Can carry over your HSA balance from year-to-year
- Earnings in your HSA grow tax-deferred

Examples of qualified medical expenses for an HSA include (but are not limited to):

- | | |
|--------------------------------|---|
| • Acupuncture | • Hearing aids and batteries |
| • Alcoholism treatment | • Hospital services |
| • Ambulance services | • Insulin |
